Cyborg operative Agent 1.22 is an emissary of T.E.R.R.A, cryogenically preserved in deep sleep between assignments. When external communication is lost with Fortress DX-B Biotech Facility, agent 1.22's Mother-Ship S.S. Mnemosyne proceeds to the third moon of Pandora 5 to discover the fate of the facility and its staff.

Who is Agent 1.22? How did she become a cyborg? Can she stop the dreaded Tempest Virus before it makes its way to Earth?
