This is the Saga of two families who left a lucrative business making and selling Peach Brandy in the Ozark/Arkansas Mountains to escape with their family to safe territory at the outbreak of the Civil War. Now Available at Amazon and most bookstores Worldwide. G-Rated This story is true with only imagined dialogue of the Johnsons, Campbells and Bostons settling on homesteads in Kansas Territory from 1857 through 1892. The Saga will continue in what is being called: Pioneers Yesterday and Today.....a truth-filled story of the back bone of this United States in the beginning of the “Manifest Destiny” Era until today when the middle income families who are still the basic moral standard bearers are still feeling the pull and tug from now the Bankers/Insurers and Oil Barrens who would control the World if they could. Originally this story was clothed in the mantle of Serenia’s Kansas and ANNE, those were adult versions of the same story, unvarnished and revealing of the entire story including what married people do to assist the Lord in creation of our children. I hope all who read PIONEERS WITH PURPOSE will see what America started as, why the Civil War was necessary and who we are beneath the hype and finesse of the politicians who would have us believe we are lacking in sincerity and truth to lead us down their paths of further lining their pockets while fleecing ours.
